

The EDMUS Grading Scale (EGS/DSS)

Confavreux C, Compston DAS, Hommes OR, McDonald WI, Thompson AJ. EDMUS, a European database for multiple sclerosis. *Journal of Neurology, Neurosurgery and Psychiatry* 1992; **55**: 671-676

Amato MP, Grimaud J, Achiti I, Bartolozzi ML, Adeleine P, Hartung H-P, Kappos L, Thompson A, Trojano M, Vukusic S, Confavreux C for the Evaluation of the EDMUS system (EVALUED) Study Group: European validation of a standardized clinical description of multiple sclerosis. *J. Neurol.* 2004; **251**: 1472-1480

Score	Criteria
0	Normal findings on neurological examination.
1	No disability. Minimal signs on neurological examination.
2	Minimal and not ambulation-related disability. Able to run.
3	Unlimited walking distance (WD) without rest but unable to run; or a significant not ambulation-related disability.
4	Walks without aid. Limited WD, but > 500 meters without rest.
5	Walks without aid. WD < 500 meters without rest.
6.0	Walks with permanent unilateral support. WD < 100 meters without rest.
6.5	Walks with permanent bilateral support. WD < 100 meters without rest.
7	Home restricted. A few steps with wall or furniture assistance. WD < 20 meters without rest.
8	Chair restricted. Unable to take a step. Some effective use of arms.
9	Bedridden and totally helpless.
10	Death due to MS.
